Software Engineer - American Express

Used Java and Javascript to develop technical solutions.

- **SOAP to REST Upgrade:** Decommissioned SOAP software for certain markets and replaced with modern REST API adapter.
- **Cache-busting:** To resolve customer issues with clearing cache, implemented a versioning system to always deliver up to date files.
- **Angular upgrade:** Updated angular libraries across multiple repositories
- **React.js features:** Contributed to react.js user stories for corporate card management features.
